ABSTRACT OF THE INVENTION

2	Units (10), systems (100), and methods with treated water are provided in which a treated
3	water source (12, 104) is included integrally in a host piece of equipment (10, 102). The host
1	piece of equipment (10, 102) includes host functions such as ice making (14, 106). Other
5	equipment, such as dispenser (108) may be coupled to the equipment (102) to share the
5	treated water from treated water source (104).
